Constructed Response

1. Use the following table on bowel cancer testing to calculate the sensitivity.

| Blood test | Bowel cancer |     |
|------------|--------------|-----|
|            | Y            | N   |
| +          | 2            | 18  |
| –          | 1            | 182 |

2. Use the table from 1 to calculate the false positive rate.
3. Use the table from 1 to calculate the probability of having bowel cancer given a positive blood test.
